

**ARDMORE**  
PRECAST CONCRETE

## Mulroy Bay Bridge

Client Donegal County Council  
Contractor BAM Civil Ltd  
Project Mulroy Bay Bridge  
Sector Roads

Mulroy Bay Bridge opened on May 2009. Ardmore Precast supplied parapet fascia panels to enhance the aesthetic appeal of the bridge. These bespoke panels were manufactured to a very high standard using 60N concrete, with rebar protruding from the back of the panel so they could be cast in-situ to form part of the bridge.

The contractor also insisted on an exposed aggregate finish at the rear of the panel so the freshly poured concrete would form a stronger bond with the panel and create a seal so it would withstand the harsh weather elements that it would be exposed to.
